

Best-in-class finance and inventory, fully integrated.

Two best-of-breed platforms. One packaged solution. Complete operational and financial control.

IMPLEMENTED BY

Sound familiar?

- "Our inventory system and accounts never talk to each other."
- Hours lost every week re-keying data between ops and finance.
- Month-end is a manual slog - nothing reconciles automatically.
- You've looked at ERP - and walked away from the price tag and the timeline.
- Growth decisions made without the financial visibility to back them up.
- Stock data sits in one system, financials in another - no single source of truth.

The integration

- iplicit owns, builds and maintains the connector
- Automated syncing - no re-keying, no lag, no manual handoffs
- One source of truth from purchase order to board report
- Live and proven

Two platforms. One complete solution.

Cin7 Core

Inventory management, built for product-driven businesses

- Authoritative source for stock levels, pricing and real-time valuation
- Sales and purchase invoices and credit notes processed natively
- Customer and supplier records auto-created from transactions
- Non-stock products dynamically added based on transaction data
- Supports retail, e-commerce, wholesale, food and beverage, and manufacturing

iplicit

Cloud finance, built for where you're going

- CFO-grade dashboards
- Multi-entity consolidation and automated revenue recognition
- Automated AP, approvals and audit-ready reporting
- ERP-grade capability - without ERP-grade cost or complexity

Who is it for?

Sectors

Manufacturing, e-commerce, wholesale, food & beverage, retail

Business Size

Growing businesses ready to move beyond Xero or Sage 50

Typical Trigger

Outgrown basic inventory tools; needs finance and stock to work as one — without enterprise complexity or price tag

Measureable impact

Scalable

Vertical-ready without enterprise complexity

Automated

Syncing across customers, suppliers, invoices & credit notes

Real-time

Stock valuation and financial data - always current

One truth

Inventory and finance unified in a single solution
